

ASI Parts System DVD Update Instructions

October 2008

ASI Parts DVD/CD Update

Close open programs. This update is for standard (default) installations. If you are updating server files, change zip extract destination to server folders containing ASI Parts.

1. Insert DVD/CD into drive(DVD/CD does not autorun).

A. If Windows “Autoplay” starts, click on
“Open folder to view files using Windows Explorer” go to step 2.

(If Windows Autoplay does NOT start)

B. On desktop or from Start Menu double left click “My Computer”.
Double click on DVD/CD drive.

(Note: Windows 98SE systems may require a manual file extraction)
(Call ASI for details)

2. Double click on “update” folder. This folder contains 2 zip(.exe) files.

3. Double click on ASIdb.exe.

4. Click “Unzip”. New files extract to hard drive. Click Close when done.

5. Double click on ASIpics.exe.

6. Click “Unzip”. New files extract to hard drive. Click Close when done.

7. Remove DVD/CD and start ASI Parts System.

8. Enter ID if asked. Update is complete.

Contact ASI if you have any questions.
