

**April 2008**

**If you get an error when running unzip of database and pictures,  
try the following fix.**

**This error was caused because the ASI Database has a “Read Only” attribute.**

**My computer**

**Double click c: drive (local hard disk)**

**Double click Program files folder**

**Double click Asiparts folder**

**Double click Database folder**

**Look for Asiparts\_DataEntry\_be.dbf**

**Right click once**

**Left click properties**

**Uncheck the Read Only box**

**Click Apply**

**Click Close**

**Return to desktop**

**Go back to ASIupdate folder on DVD**

**Rerun ASIdb.exe.**

**Do not run ASIpics.exe as these files may be read only also and will produce  
the same error.**

**Leave DVD in drive.**

**Start ASI Parts.**

**Enter Logon ID if asked.**

**Click on system options (Menu item # 5)**

**Look for and click on Install Pictures tab**

**Answer Yes and OK for default folder.**

**This completes update.**
